FOLDING GLASS SYSTEMS

STANDARD SYSTEM

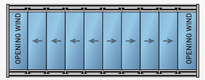
GLASS SYSTEMS ► FOLDING GLASS SYSTEMS

This is a successful architectural solution that integrates indoor comfort with an outdoor living space.

This stunning design concept has been intricately developed in order to fit with any type of architecture, classic or modern. A delightful design line running throughout the product enables any colour combination so that it can be personalized to individual taste. Due to the innovative suspension system each glass panel slides smoothly into place.

CONFIGURATIONS

Single opening wing



Double opening wing

GLASS OPTIONS

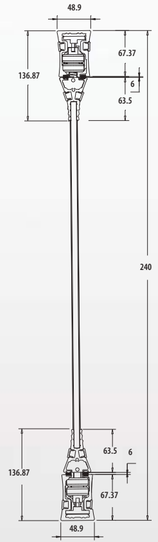
- 8mm Tempered (Coloured)

GLASS COLOR OPTIONS

- Transparent (Standard)
- Blue
- Green
- Smoked

DIMENSIONS

Max Height	240 cm
Max Width	600 cm
Max Wing Width	67 cm
Min Wing Width	50 cm



HANGING SYSTEM

With its special frameless design the customer is able to enjoy the panoramic views around them, from within the enclosed area.

With a specially designed joint system, that screws the glass directly to the profile providing extra strength and stability, the glass panels are moved safely only along the top rail. This wheel system has an intelligent parking technology where the pane of glass is guided into the right track by itself.

Wheels at the top of each panel are adjustable to ensure easy manoeuvring.

CONFIGURATIONS

GLASS OPTIONS

- 10mm Tempered

ACCESSORIES

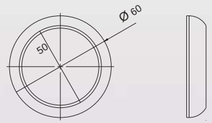
HANDLES

ACCESSORIES

CIRCLE

It's beautiful design complements each individual project beautifully.

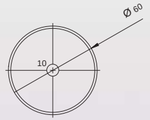
» Drill hole in glass: Ø 50mm
» Outer: Ø 60mm



CYLINDER

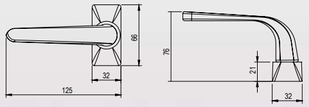
Both stylish and functional this cylinder door handle is made from stainless steel. Its dual notch design enables it to snuggle perfectly into the hand and it is a preferred option in many projects.

» Drill hole in glass: Ø 10mm
» Outer: Ø 60mm



STANDARD DOOR HANDLE

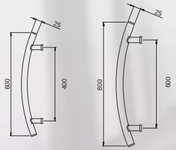
This decorative handle is the indispensable accessory of aluminum doors with its hand holding comfort.



OVAL SERIES

The handle on a door is actually more important than anyone realizes.

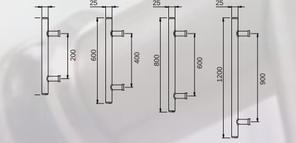
» Drill hole in glass: Ø 10mm



LINEAR SERIES

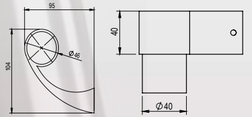
The stylish Linear Series is a push & pull handle that is screwed directly into the glass door and is available in 4 lengths in stainless steel. With its classic, slim design it fits to any project.

» Drill hole in glass: Ø 10mm



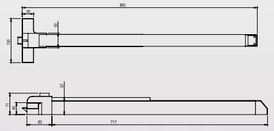
VERTICAL HANDLE

These decorative holders are used throughout the wing height on aluminum doors. Doors are opened and closed by pushing these holders from inside or outside.



PANIC BAR

Panic bar is used in single and double wing alüminium doors and allows the door to be opened by pushing the bar. The door where this panic bar is fitted can optionally be locked and unlocked from the outside.



LOCKS

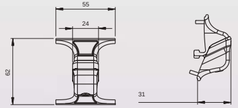
ACCESSORIES

INSULATED SLIDING GLASS LOCK

This Lock is used on insulated sliding glass panels. With its intelligent Lock-in-feature, all metal parts are made from Stainless Steel and are of highest quality to enable smooth operation which makes it a joy to use.

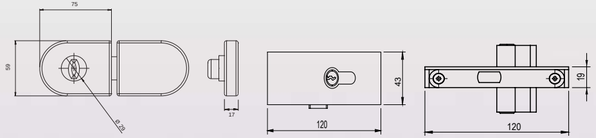
FOLDING GLASS LOCK

This lock is used for all of our folding glass systems. Its combination of advanced technology and design enables easy operation at all times. It is a functional solution to lock the glass panels.



FOLDING GLASS KEY LOCK

A reliable locking system with the added benefit of extremely easy installation, our folding glass systems are turned to the locked or unlocked position from the inside and unlocked from the outside with a key.

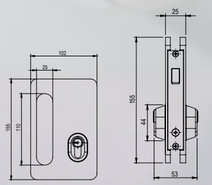


HSM LOCK

In sliding and hanging systems, it enables the first opening wing to be locked with key from inside and outside. These lock connected to the floor.

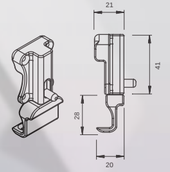
HTP LOCK

It is a stainless steel sliding glass lock, with both lock and handle in a visual concept. Lock is used in 3 and 5 rail sliding glass systems. It should be fitted on a elbow height level. This lock allows the system to be locked from inside and outside.



SLIDING GLASS MIDDLE LOCK

This beautiful security system for sliding glass is used on the middle rails of our sliding glass systems. All Metal Parts are made from Stainless Steel.



SLIDING GLASS INTERNAL LOCK

This attractive and functional locking system is used in Sliding Glass applications. It is installed on the internal side of the application and all metal parts are made from stainless steel. The bolt is designed to easily slip into the lock.
