A wide-angle photograph of a luxurious outdoor lounge area at dusk. In the foreground, a large infinity pool with a blue tint reflects the sky and the structures. Behind the pool, a white pergola with a blue-tinted roof stands on a stone deck. Under the pergola, there is a three-seater sofa and two armchairs, all with light-colored cushions. The background is filled with dense green foliage and a distant cityscape under a twilight sky. The overall mood is serene and sophisticated.

CONTROL & AUTOMATION

CONNEXOON

Designed to easily control your product wherever you are in the world, despite the weather changes you can remotely activate your products accordingly.

Compatible with iOS and Android smartphone systems. You can assign multiple functions through created scenarios, you can give a one-touch command.

- A** **Telis 1** Elegant design that allows you to easily control your product.
* The standard control unity.
- B** **Lounge** Elegant design with black color.
- C** **Patio** IP 66 water-proof feature for outdoor use.

- D** 16-channel ergonomic design that allows you to control all functions at the same time from one control. By digital screen feature you can control different products with a symbol and a number given for different products.

- E** Functional design that allows the adjustment of the illuminations to the desired level with the Roller feature.

MULTI CHANNEL OPTIONS

Telis 1 is remote control with 1 channel, while the Telis 4 has got 4 channels. Telis 4 option is available for Pure, Lounge, Patio, RTS Lounge Roller and RTS Pure Roller.

SUN SENSOR

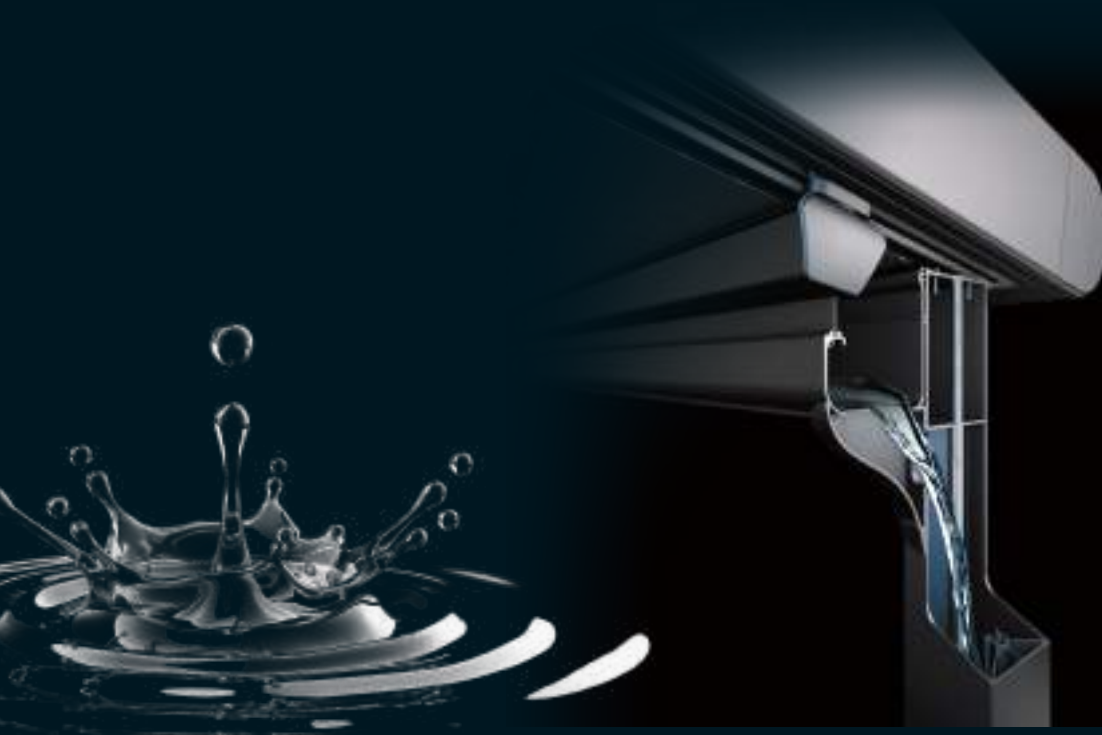

It automatically opens product in sunny weather and provides maximum protection from the sun.

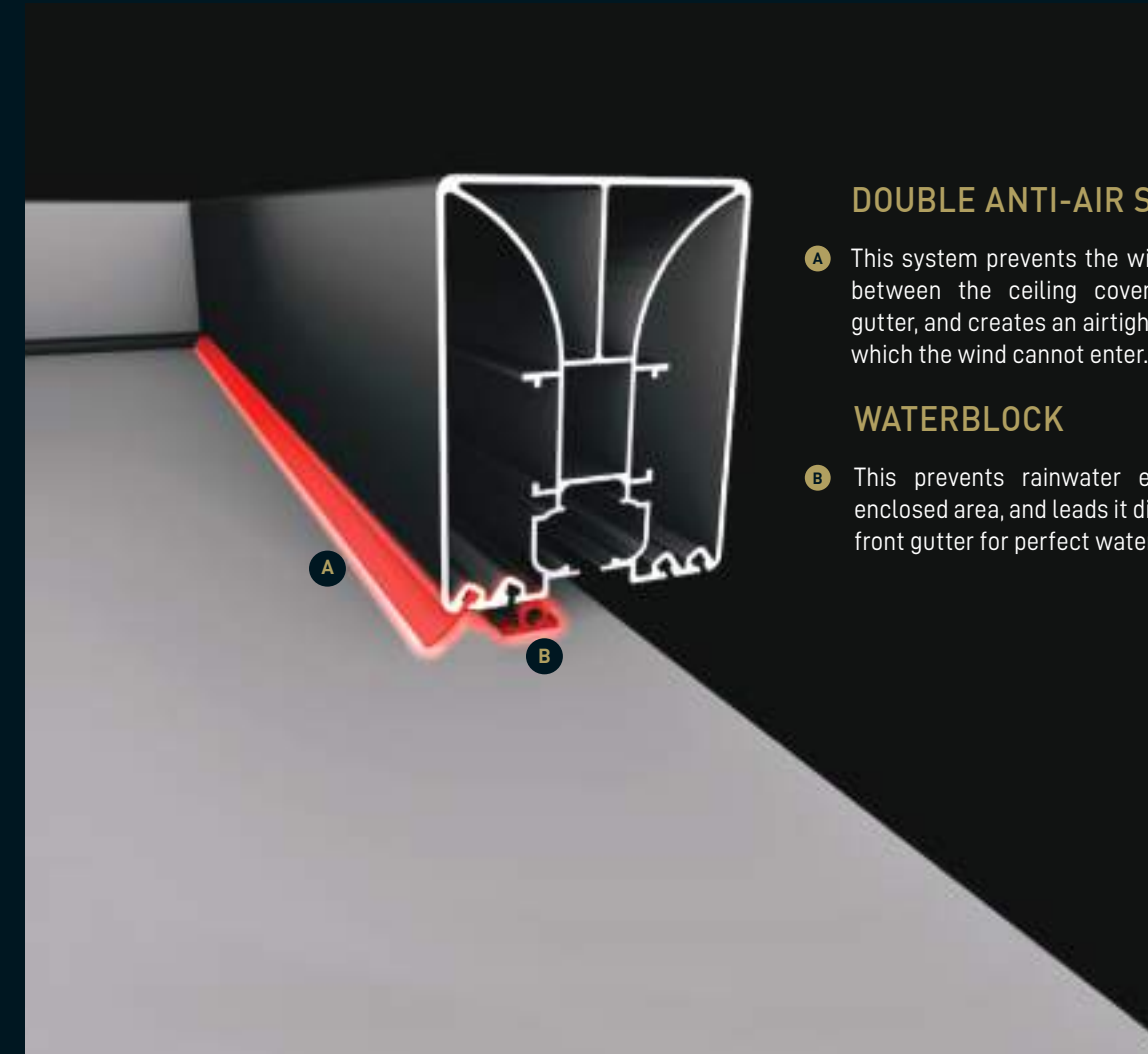

WIND SENSOR

It measures the wind speed and automatically retracts your product when high wind speed is detected.

WATER DRAINAGE & SEALING

The hidden part of the drainage system which was ingeniously integrated inside both beams and pillars makes effortlessly possible the discharge of water.

DOUBLE ANTI-AIR SYSTEM

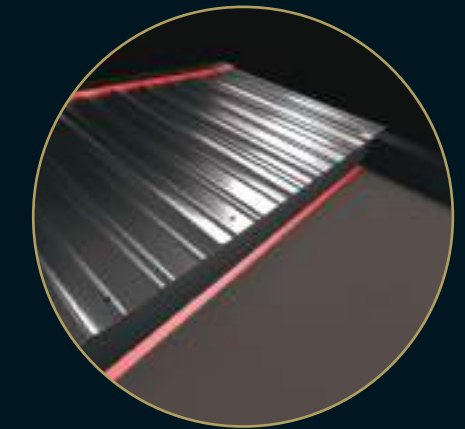

- A** This system prevents the wind entering between the ceiling cover, rails and gutter, and creates an airtight space into which the wind cannot enter.

WATERBLOCK

- B** This prevents rainwater entering the enclosed area, and leads it directly to the front gutter for perfect water drainage.

Gutter Seal

Back Seal

STRUCTURAL DESIGN

Plus and Compact series provide a clean surface and perfect view by concealing all connection details made with stainless steel screws and parts.

GEOMETRIC CROSS SECTION

With its geometric design, the specially engineered inner section gives maximum strength and wind resistance to the aluminium rail profile.

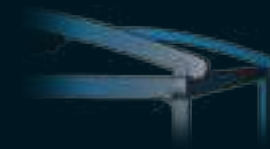

PILLAR BASE

Stainless steel base hides all the floor installations inside, drains the water to the outside and gives an exclusive finish to your product.

PROFILE CAP CHOICES

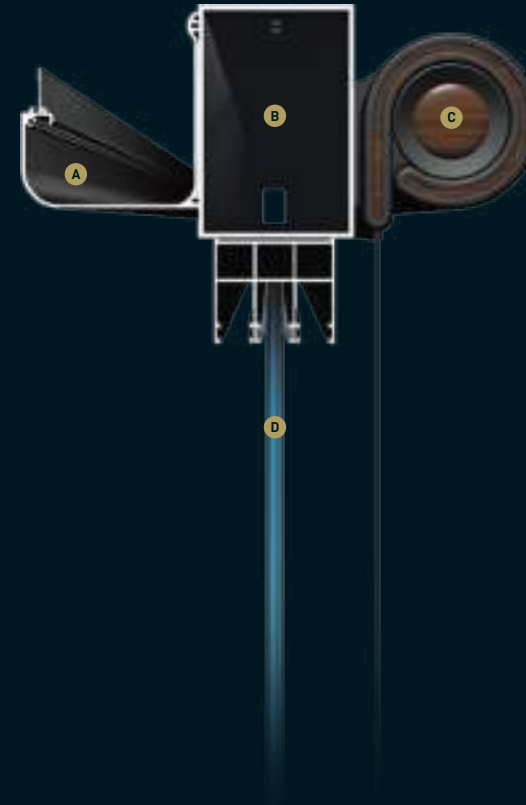

Give a personal touch to your pergola by choosing from a rounded or straight ended cap.

HORIZONTAL BEAMS

The front and side beam on the same horizontal level, giving a continuous line throughout the product, ensuring a smooth relaxing overall look, which is a delight to the eye.

* Doesn't include the compact series.

SEPARATE GUTTER PROFILE

RAIN GUTTER A

The gutter with its height adjustment feature, provides the anti-air system, in different positions to ensure a perfect fit, according to the inclination of your product.

SEPARATE FRONT BEAM B

The separated front beam carries all the weight of the roof without putting any pressure on the gutter. Additionally it is also responsible for carrying awnings and glass systems.

VERTICAL BLIND C

Horizontal sun rays can be reduced with a vertical blind. It is a full cassette awning and the Ferrari Soltis fabric, provides shade without interrupting the view.

GLASS SYSTEMS D

Different glass systems can be installed directly onto the front beam.

APPLICATION TYPES & SOLUTIONS

RAIL POSITIONING

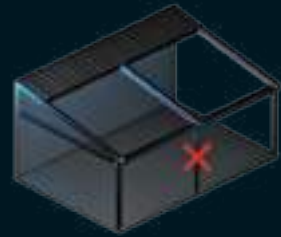

Standard

Standard

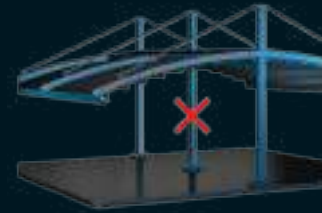

Custom

MODIFIABILITY

Allows modifications on the main constructions by changing the main aluminium beam and pillars with steel.

MIDDLE PILLAR REDUCTION

Provides a flexibility to remove the middle pillars by performing optional system changes.

PILLAR POSITION CHANGE

Pillars have the ability to shift up to 50 cm according to the structural needs of the Project.
